SECURITY INFORMATION

COUNTRY	Poland	REPORT NO.	[REDACTED] 25X1A
SUBJECT	Gdansk Shipyards	DATE DISTR.	18 September 1953
25X1A		NO. OF PAGES	1
DATE OF INFO.	[REDACTED]	REQUIREMENT NO.	RD
PLACE ACQUIRED	[REDACTED]	REFERENCES	

25X1X

1. A very large steel framed hall with wooden and brick walls¹ was constructed between the Stocznia Gdanskie (Gdansk Shipyards) and Stocznia Polnocna (Northern Shipyard) at the end of 1952. Four new branch railroad tracks lead into the hall and a large mobile crane was observed lifting machines that were being installed in the hall. Informant has heard that steel ribs for ships will be constructed in the hall.
2. The hall is about 250 to 300 meters in length, 30 meters wide, and is at least three or four stories high. Many windows have been placed in the roof and walls of the hall. The windows along the walls are located relatively high above the ground level.
3. The Stocznia Gdanskie shipyard is constructing many fishing trawlers of about 600 to 800 tons each. According to informant, these trawlers could be used by the navy to transport guns and tanks because their decks are extremely strong.

- 25X1A 1. [REDACTED] Comment: The walls are called "mur pruski" (Prussian walls) in Polish, which means that wooden beams are placed at intervals between the bricks.
